

LEAGUE^{of} LEGENDS

FRONTIER NARRATIVE

League of Legends has invested itself into a universe that can develop in any direction it pleases since the storylines between champions are not necessarily connected by plot or chronology. This capacity for constant creation of new, uncharted narrative lands is a type of storytelling I call frontier narrative.

LORE INTEGRATION

Unlike games that use mechanics to enrich a game's narrative, League uses its narrative to enrich player mechanics. This type of narrative delivery gives players fragments, the best pieces of the stories behind their favorite champion. In a way, they're a bit like the ultimate easter eggs that succeed in creating intrigue, and in effect, entry points for players to engage with the lore.
